OPEN SKILLS. VERIFIED DATA. ONE ENDPOINT.

The data layer for the music industry.

Install open skills and agents from GitHub. Query sourced directories, events and opportunities through one API and MCP server. Start free. Pay when you need the verified data.

Get a free key | View on GitHub

Start free. Pay for the data.

The skills are open. The hosted data, higher limits and premium playbooks sit behind a key.

FREE

$0

For artists and builders testing the hub.

Get a free key

- All public skills, agents and workflows
- Read-only API and MCP server, [YOUR DAILY LIMIT] requests a day
- Events, venues and resources with sources shown
- Community support

PRO

Recommended

[YOUR PRICE] per month

For working artists, managers and small teams who need verified contacts.

Verified contact details	Not included	Included	Included
Premium playbooks	Not included	Included	Included
Bulk export	Not included	Not included	Where licensing allows
Source, license and verification on every record	Included	Included	Included
Support	Community	Email	Priority

Works with the tools you already use

STEP 1

Install a skill

Every skill is a SKILL.md folder in the public repository. Add it to Claude or any harness that reads the open format.

STEP 2

Connect the MCP server

Point your client at the remote MCP endpoint and add your key. Your assistant can now query the music-industry data.

STEP 3

Or call the REST API

Use the same data from your own app, automation or website through versioned REST endpoints.

Licensing and data terms

Skills and agents are published under [YOUR LICENSE]. API data is governed by separate API terms [LINK]. Every record carries its source, license and verification status. Contact details are available only to member keys, and anyone can ask to be removed.

Questions

Which tools does it work with?

Any client that supports MCP or REST, including Claude, ChatGPT and independent harnesses.

What happens at the free limit?

Requests return a rate-limit response until the window resets. Upgrade for higher limits.

Can I reuse the free skills?

Check the license in the repository before you redistribute them. The data behind the API follows the API terms.

How do I remove my information?

Use the opt-out endpoint or email hello@artispreneur.com.

Art Means Business.

Install a skill, connect the server and put the music industry's data to work.
