n8n + Make.com · Composio connectors · Bring your own keys

Describe who you want to reach. Get an outbound engine you own.

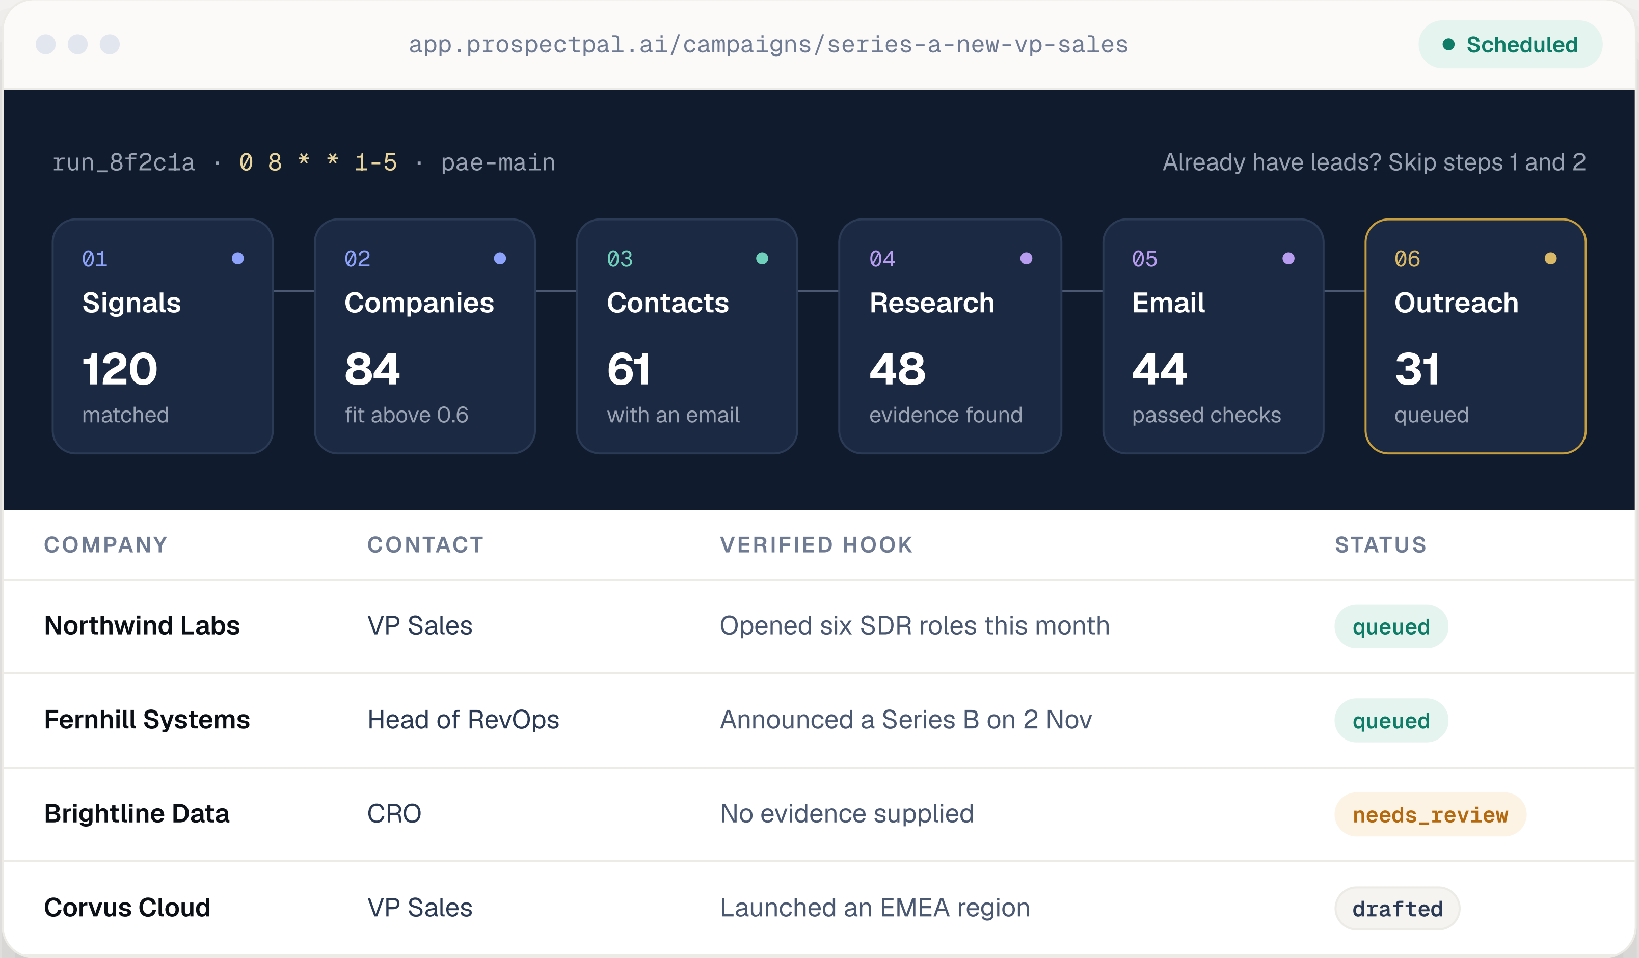
The agent turns one conversation into a six-step prospecting workflow, portable skills for every step, and a campaign that runs on a schedule.

Book demos with new VPs of sales at Series A SaaS companies

`dry_run: true` Nothing sends until you say so

Build my engine →

Re-engage closed-lost deals from last year · Recruit agency partners in EMEA · Reach RevOps leads at companies hiring SDRs



app.prospectpal.ai/campaigns/series-a-new-vp-sales · Scheduled

`run_8f2c1a · 0 8 * * 1-5 · pae-main`

Already have leads? Skip steps 1 and 2

01	02	03	04	05	06
Signals	Companies	Contacts	Research	Email	Outreach
120	84	61	48	44	31
matched	fit above 0.6	with an email	evidence found	passed checks	queued

COMPANY	CONTACT	VERIFIED HOOK	STATUS
Northwind Labs	VP Sales	Opened six SDR roles this month	queued
Fernhill Systems	Head of RevOps	Announced a Series B on 2 Nov	queued
Brightline Data	CRO	No evidence supplied	needs_review
Corvus Cloud	VP Sales	Launched an EMEA region	drafted

6 steps	3 AI calls	17 statuses	0 sends
Signal to sequence	Fit, research, email. The rest is code	Every lead is accounted for	Until you switch off the dry run

THE SIX-STEP PROCESS

Each step is a slot. You choose what fills it.

Three steps use AI. Everything else is plain code, so counts, checks and sending rules are repeatable.

01	Signals	code
02	Companies	code + ai
03	Contacts	code
04	Research	ai + verify
05	Email	ai + checks
06	Outreach	code

Step 01 · code

Signals

Turns your ideal-customer description and buying signals into a short brief every later step scores against.

CONNECT TO	
ICP only, or a general prompt	`signals_source: icp_only`
Another workflow or web search	`signals_source: http`

A run stops with a clear message if a required setting is still unfilled.

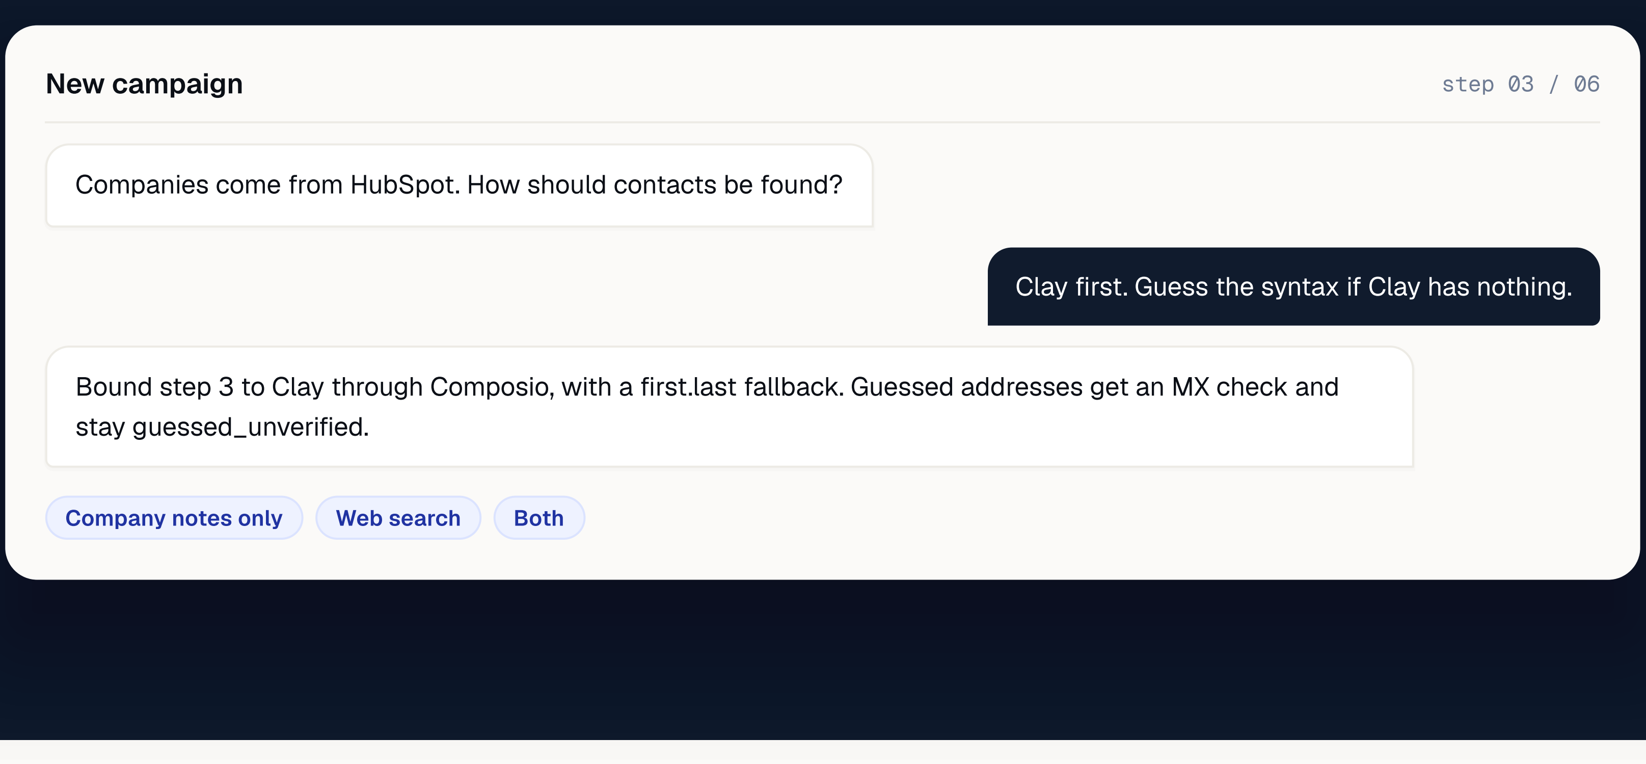
That's it. Everything else is a connector, prompt or tool.

THE BUILD AGENT

One question at a time. One step bound per answer.

The agent breaks your goal into the six steps, asks which tool fills each slot, and shows the build spec filling in beside the chat. When every slot is bound, it compiles.

- Compiles to n8n JSON or a Make.com scenario blueprint
- Ships with `dry_run: true` and `outreach_mode: log_only`
- Every answer is versioned, so campaigns carry their history



New campaign step 03 / 06

Companies come from HubSpot. How should contacts be found?

Clay first. Guess the syntax if Clay has nothing.

Bound step 3 to Clay through Composio, with a first.last fallback. Guessed addresses get an MX check and stay guessed_unverified.

Company notes only · Web search · Both

WHAT YOU LEAVE WITH

Three ways to run it. None of them lock you in.

A workflow on your instance

Deploy straight to your n8n or Make.com account, or download the JSON. The workflow lives entirely on your instance.

`pae-main.json · pae-error-alert.json`

Skills you can upload anywhere

One master skill plus one per step, tuned to your answers. Upload them to Claude, ChatGPT, Cursor or an n8n AI agent.

`prospect-outreach.zip · prospect-step-1…6.zip`

A campaign on a schedule

Keep the campaign inside the agent and run it as a cron job. Each run posts a report with one row per lead and an honest nothing_was_sent flag.

`cron: 0 8 * * 1-5 · callback_url`

CONNECTORS + YOUR KEYS

Every Composio toolkit. Your own model keys.

Connect CRMs, data tools, mailboxes and sequencers once through Composio. Bring your own Anthropic or OpenAI key; you pay the model provider directly.

SAFETY DEFAULTS

- Nothing sends until `dry_run` and `outreach_mode` are changed on purpose.
- A live send needs an opt-out line in your signature.
- Keys live in credentials, never in a config row or a prompt.

PRICING

Pay for the builder, not per lead.

BUILDER

$0 / month

Design and download. Run it yourself.

- 1 campaign
- n8n + Make.com export
- All 8 skills
- Dry run only in-app

Start building

Most teams start here

PRO

$49 / month

Keep campaigns in the agent and schedule them.

- Unlimited campaigns
- Cron scheduling + run reports
- Every Composio toolkit
- One-click deploy to your instance

Start Pro

TEAM

$199 / month

Shared keys vault and a review queue.

- 5 seats
- Shared BYOK vault
- Approval queue for needs_review
- Versioned answer history

Start Team

Answer the agent. Get a workflow you own.
