Prospect Automation Engine

Scale qualified outbound pipeline with autonomous, client-owned revenue systems.

THE RESEARCH BOTTLENECK

20hrs

Lost weekly per sales rep to manual account research.

The 6-Step Workflow

Everything else is a connector, a prompt, or a tool.

1

Signals

Identify targets and timing.

2

Companies

One deduplicated list.

3

Contacts

Buyers plus verified email.

4

Research

Why they would buy today.

5

Email

Personalized messaging token.

6

Outreach

CRM sync and sequencer.

PHASE 01

Signals & Targeting

Automated ingestion of intent data translated into verified target accounts.

Detect Buying Signals

Identify funding rounds, leadership changes, and active tech adoption.

Account Deduplication

CRM dedupe shield prevents duplicate outreach and protects active deals.

PHASE 02

Contacts & Research

Extract decision-makers and synthesize relevant context before contact.

Verified Personas

Waterfall enrichment ensures 100% verified work emails prior to send.

Deep Account Intel

Extract pain points directly from SEC filings, news, and social signals.

The Messaging Strategy

How we scale personalization inside your existing sequencer.

Traditional Full Email

- ✕ Breaks existing CRM templates.
- ✕ Inconsistent rep signatures.
- ✕ Harder to A/B test first lines.

SALESGENCY METHOD

The Body-Only Token

```
Hi {{first_name}},

{{ai_email_1_body}}

Best,
{{signature}}
```

Built For Frontline Revenue

Live in 30 Days

Production system shipped in weeks, not months.

Client-Owned

Built securely inside your own data and CRM stack.

Human Approved

Built-in safety gates prior to any live prospect touch.
