Loadsmart ABM Pod Dashboard

Sample data

Daily view of the ABM pipeline: accounts, persona coverage, sequence results and leaks, by pod and product.

All pods | All products | Import CSV | Download CSV template | Load sample data

Active accounts	Covered accounts	Reply rate
52	**67.3%**	**11.3%**
60 assigned, 8 disqualified	35 with 2+ personas	34 replies / 300 delivered

Meetings held	Stage 2 opps	Task completion
14	**7**	**68.0%**
14 accounts	from ABM accounts	257 / 378 call + LinkedIn

Account funnel

Accounts reaching each outcome, then how ready the active list is. The red bar is the highest stage below target; fix that first, since stages under it are probably symptoms. Dashed line = target.

Assigned	60
Kept (active)	52 87% of prior
Engaged (reply)	28 54% of prior
Meeting held	14 50% of prior
Stage 2 opp	7 50% of prior

Readiness of active accounts

Fresh signal (60d)	20 38.5% (target 50.0%)
Covered (2+ personas)	35 67.3% (target 70.0%)

Leak flags

Checked top-down against starting thresholds (replace with your 30-day baseline).

List: pod acceptance 86.7%
Accounts kept / assigned. Below 80.0% means account selection is off; read the DQ reasons before changing copy.

Timing: 38.5% of active accounts have a signal under 60 days
Static lists get polite "not now" replies. Feed la-signal before adding volume.

Coverage: 67.3% of accounts have 2+ product personas
Single-threaded accounts stall. Re-run la-persona-enrich on the empty slots.

Data: hard bounce 0.3%
Keep verification on every contact before enrollment.

Follow-through: 68.0% of call and LinkedIn tasks done
Email alone rarely books enterprise meetings. Check the pod's daily task queue.

Conversion: 50.0% of engaged accounts reached a meeting
Replies without meetings point to persona fit or the CTA, not the list.

Pods side by side

Quality, activity and outcomes per pod. Click a header to sort.

Pod ▲	Acceptance	Fresh signal	Coverage	Bounce	Reply rate	Tasks done	Meetings	Stage 2
pod-1	95.0%	47.4%	68.4%	0.0%	7.1%	74.8%	7	3
pod-2	80.0%	31.3%	62.5%	0.9%	13.9%	73.8%	4	3
pod-3	85.0%	35.3%	70.6%	0.0%	13.9%	51.4%	3	1

Persona coverage by account

A verified contact for each product's buyer. Covered = 2 of 3. Sorted by priority.

Opendock: ops / DC leader ShipperGuide: transportation Loadsmart AI: supply chain exec

Account	Pod	Priority	Signal	OD	SG	AI	Mtgs
Sample Account A06	pod-1	98	Leadership change 27d	☐	☐	☐	1

Sample Account A15 single	pod-1	98	New site 49d	☐	☐	☐	0
Sample Account C09	pod-3	96	Hiring transport 84d	☐	☐	☐	0
Sample Account A12 single	pod-1	95	Hiring transport 56d	☐	☐	☐	1
Sample Account B05	pod-2	93	Intent 97d	☐	☐	☐	0
Sample Account A14 single	pod-1	92	Intent 7d	☐	☐	☐	0
Sample Account B17 single	pod-2	92	New site 83d	☐	☐	☐	1
Sample Account C01	pod-	92	Hiring transport 107d	☐	☐	☐	0

Disqualification reasons

Why pods dropped accounts. A reason that repeats becomes a rule in account selection.

Current customer	4
Wrong industry	3
No persona found	1

Signal precision

Share of active accounts with each signal type that reached a held meeting.

TMS change n=7	42.9%
Leadership change n=5	40.0%
Earnings mention n=6	33.3%
No signal n=10	30.0%
Hiring transport n=7	28.6%
Hiring ops n=5	20.0%
New site n=7	14.3%
Intent n=5	0.0%

Small n means read with care. "No signal" is the control group for the holdout test.

Daily digest

Plain-text summary for Slack or email. Copy and paste.

```
ABM daily digest — All pods, all products (SAMPLE DATA, not real results)
Accounts: 52 active of 60 assigned (86.7% kept)
Coverage: 35 accounts with 2+ personas (67.3%); fresh signal on 38.5%
Email: 301 sent, 1 hard bounces (0.3%), 34 replies (11.3% of delivered)
Tasks: 257/378 call + LinkedIn done (68.0%)
Outcomes: 14 meetings held, 7 stage 2 opps
Top leak: Timing: 38.5% of active accounts have a signal under 60 days. Static
lists get polite "not now" replies. Feed la-signal before adding volume.
